

We are 1 Million

Last week Qustodio reached the incredible mark of 1,000,000 users, an astonishing feat representing the successful validation of our story as a startup company and signaling the beginning of a new and exciting chapter as a global player.

During the last 5 years since our official launch we have helped parents and organizations in over 240 countries across the world improve the way they supervise their connected devices.

We'd like to thank you for depositing your trust in us, and understanding the value proposition that makes Qustodio so unique. It's people like our longest running active subscriber, a Canadian, who first signed up for Qustodio back in October 2011, and our first ever paying customer, a Minnesotan, who signed up in November 2012, that have made us the most popular brand in the space.

Interest over time according to Google Trends

We want to thank all our current and past users, subscribers, customers, employees, partners and collaborators for being part of our success.

The Qustodio Team.
